IAM

the International Association for Metacognition

8th Bi-Annual Meeting
Thursday, November 20, 2014
Hyatt Regency Long Beach **Beacon A**
Long Beach, California

12:00 Registration opens (no fee)

12:30 Nate Kornell & Hannah Hausman, Williams College
Performance bias: judgments of learning are insensitive to observable improvement

12:45 Kathleen Hourihan, Memorial University of Newfoundland
Jonathan Tullis, Indiana University
When will bigger be (recalled) better? The influence of category size on JOLs depends on test format

1:00 Thomas D. Griffin & Jennifer Wiley, University of Illinois at Chicago
Absolute accuracy is a relatively inaccurate measure of monitoring processes

1:15 Jonathan Tullis, Indiana University
The wonders and woes of self-paced learning

1:30 Break

1:45 Cristina Sampaio, Western Washington University
William F. Brewer, University of Illinois at Urbana-Champaign
An overview of the metamemory approach to judgments of immediate confidence

2:00 Lisa K. Son, Barnard College
The don't know judgment: familiarity triggers an early deadline

2:15 Rakefet Ackerman, Technion—Israel Institute of Technology
Valerie Thompson, University of Saskatchewan
Meta-reasoning: what can we learn from meta-memory?

2:30 Scott Fraundorf, University of Pittsburgh
Knowing the crowd within: metacognitive limits on combining multiple judgments

2:45 Break

3:00 Keynote Address: **Robert A. Bjork**, University of California, Los Angeles
Mending metacognitive illusions
